Remarks
Anmerkungen

A	Alle eingesetzten Prüfmittel waren zum angegebenen Prüfzeitraum gemäß eines festgelegten Kalibrierungsprogramms unseres Prüfhauses kalibriert. Sie entsprechen den in den Prüfprogrammen hinterlegten Anforderungen. Die Rückverfolgbarkeit der eingesetzten Prüfmittel ist durch die Einhaltung der Regelungen unseres Managementsystems gegeben. Detaillierte Informationen bezüglich Prüfkonditionen, Prüfequipment und Messunsicherheiten sind im Prüflabor vorhanden und können auf Wunsch bereitgestellt werden. <i>The equipment used during the specified testing period was calibrated according to our test laboratory calibration program. The equipment fulfils the requirements included in the relevant standards. The traceability of the test equipment used is ensured by compliance with the regulations of our management system. Detailed information regarding test conditions, equipment and measurement uncertainty is available in the test laboratory and could be provided on request.</i>
B	Wie vertraglich vereinbart, wurde dieses Dokument nur digital unterzeichnet. Der TÜV Rheinland hat nicht überprüft, welche rechtlichen oder sonstigen diesbezüglichen Anforderungen für dieses Dokument gelten. Diese Überprüfung liegt in der Verantwortung des Benutzers dieses Dokuments. Auf Verlangen des Kunden kann der TÜV Rheinland die Gültigkeit der digitalen Signatur durch ein gesondertes Dokument bestätigen. Diese Anfrage ist an unseren Vertrieb zu richten. Eine Umweltgebühr für einen solchen zusätzlichen Service wird erhoben. <i>As contractually agreed, this document has been signed digitally only. TUV Rheinland has not verified and unable to verify which legal or other pertaining requirements are applicable for this document. Such verification is within the responsibility of the user of this document. Upon request by its client, TUV Rheinland can confirm the validity of the digital signature by a separate document. Such request shall be addressed to our Sales department. An environmental fee for such additional service will be charged.</i>
C	Prüfklausel mit der Note * wurden an qualifizierte Unterauftragnehmer vergeben und sind unter der jeweiligen Prüfklausel des Berichts beschrieben. Abweichungen von Prüfspezifikation(en) oder Kundenanforderungen sind in der jeweiligen Prüfklausel im Bericht aufgeführt. <i>Test clauses with remark of * are subcontracted to qualified subcontractors and described under the respective test clause in the report.</i> <i>Deviations of testing specification(s) or customer requirements are listed in specific test clause in the report.</i>
D	Die Entscheidungsregel für Konformitätserklärungen in diesem Prüfbericht basiert auf der "Null-Grenzwert-Regel" und der "Einfachen Akzeptanz" gemäß ILAC GC8:2019 und IEC Guide 115:2023, es sei denn, in der auf Seite 1 dieses Berichts genannten angewandten Norm ist etwas anderes festgelegt oder vom Kunden gewünscht. Dies bedeutet, dass die Messunsicherheit nicht berücksichtigt wird und daher auch nicht im Prüfbericht angegeben wird. <i>The decision rule for statements of conformity in this test report is based on the "Zero Guard Band Rule" and "Simple Acceptance" in accordance to ILAC GC8:2019 and IEC Guide 115:2023, unless otherwise specified in the applied standard mentioned on Page 1 of this report or requested by the customer. This means that measurement uncertainty is not taken in account and hence also not declared in the test report.</i>
E	Wenn auf dem Bericht kein Akkreditierungshinweis aufgebracht ist, wurde der Bericht nicht im akkreditierten Bereich erstellt und ist folglich auch nicht vom EA MLA abgedeckt. Unabhängig davon wurde der Bericht auf Basis der allgemeinen Regeln der ISO/IEC 17000er Reihe erstellt. Mit "#" gekennzeichnete Prüfungen sind nicht Bestandteil der Akkreditierung D-PL-22040-01-00. <i>If there is no accreditation notice on the report, the report has not been produced in the accredited area and is consequently not covered by the EA MLA. Regardless of this, the report has been prepared based on the general rules of the ISO/IEC 17000 series. Tests marked with "#" are not covered by the accreditation D-PL-22040-01-00.</i>

General information Allgemeine Informationen

1 General information

1.1 Executive summary

Measurement of spectral optical reflectance

The procedure used here is analogous to the determination of spectral transmittance described in Section 7 and 8 of ISO 13468-2. The test set-up is shown in the figure below. The sample is irradiated by a beam whose axis has an angle of 8° with respect to the vertical on the sample surface. Spectral reflectance is measured in the wavelength range 300 nm to 1600 nm. Measurement is performed using an integrating sphere with 150 mm inner diameter, suitable to collect the entire (hemispherically) reflected light. The measuring spot size is 10 mm in diameter.

Based on the resulting spectral optical reflectance curves, the ISO 9050 external light reflectance is calculated, which involves weighting by:

- D65 solar spectral irradiance in accordance with ISO/CIE 10526
- Spectral luminous efficiency for photopic vision (standard observer for photometry) in accordance with ISO/CIE 10527

For the detailed calculation specification, see Appendix A.

General information
Allgemeine Informationen

1.2 Setting of tasks

According to the inquiry of the customer following measurements on the below listed crystalline PV module(s) shall be performed:

- Spectral hemispherical optical reflectance of one PV module shall be measured analogous to ISO 13468-2:1999 but extended to the wavelength range 300 nm to 1600 nm.
- "External light reflectance" shall be calculated according to ISO 9050:2003.

1.3 Summary of test results

- When measuring on a solar cell, the external light reflectance of the PV module surface is on average 1.1%. External light reflectance varies between 1.09% and 1.12%, depending on the solar cell investigated.
- When measuring at the middle of the PV module, on the surface of the middle bus ribbon surface, the external light reflectance was approx. 1.37%, based on one measurement location.

3 Module examinations

3.1 Measurement of spectral optical reflectance

External light reflectance was computed from spectral optical reflectance in accordance with ISO 9050, Section 3.4.1 (see Appendix A).

Test date [yyyy-mm-dd]	21/10/2025	
Sample No.	HV2025002151	
No. of measurement locations	4, as specified in the picture below	
Measurement location	ISO 9050 external light reflectance	Average
Cell R7C1	1.09%	1.1%
Cell R13C2	1.10%	
Cell R17C3	1.12%	
Middle bus ribbon	1.37%	—

Summary of results:

- When measuring on a solar cell, the external light reflectance of the PV module surface is on average 1.1%. External light reflectance varies between 1.09% and 1.12%, depending on the solar cells investigated.
- When measuring at the middle of the PV module, on the surface of the middle bus ribbon surface, the external light reflectance is approx. 1.37%, based on one measurement location.

Supplementary information: The measurement of Backsheet (between solar cells) could not be performed, due to limited accessibility resulting from the module's design.
Instead, measurement on the middle bus ribbon surface was performed. (see picture on page 9).

Additional documentation
Zusatzdokumentation

Appendix A: Calculation of ISO 9050 external light reflectance $\rho_{v,o}$
(ISO 9050, Section 3.4.1)

$$\rho_{v,o} = \frac{\sum_{\lambda=380\text{ nm}}^{780\text{ nm}} \rho_o(\lambda) D_{\lambda} V(\lambda) \Delta\lambda}{\sum_{\lambda=380\text{ nm}}^{780\text{ nm}} D_{\lambda} V(\lambda) \Delta\lambda}$$

$\rho_o(\lambda)$ is the spectral external reflectance of the glazing

D_{λ} is the relative spectral distribution of illuminant D65 (see ISO/CIE 10526)

$V(\lambda)$ is the spectral luminous efficiency for photopic vision defining the standard observer for photometry (see ISO/CIE 10527)

$\Delta\lambda$ is the wavelength interval

D65 relative spectral irradiance and Spectral luminous efficiency
