

Notice – SigenStack Lifting Tool Kit

Background

This lifting tool increases the ease and stability of SigenStack installation. When installing a stack of ≥ 4 SigenStack modules, the lifting tool is recommended to be used from the fourth module on to lift the SigenStack module up, securing a safe and convenient lifting process.

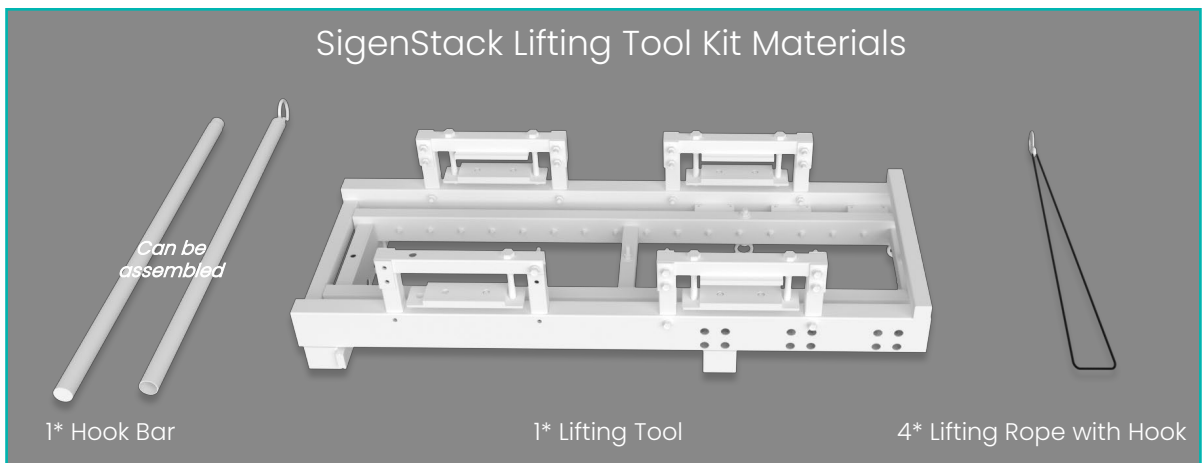

Basic information

Product Code	Product Model	Dimensions (W / D / H)	Weight	CRM Launch
11180021	SigenStack Lifting Tool Kit	1185 / 500 / 340 mm	53 kg	2025/08/25

Note: All dimensions and weight are for the packing box. CRM Launch is estimated on 25th August.

Product introduction

The SigenStack lifting tool kit includes one lifting tool, one hook bar, and four lifting ropes with hook. The load capacity is 200kg. Brief installation processes are illustrated as below. As for detailed installations, please refer to the installation video and guide.

1. SigenStack module lifting process

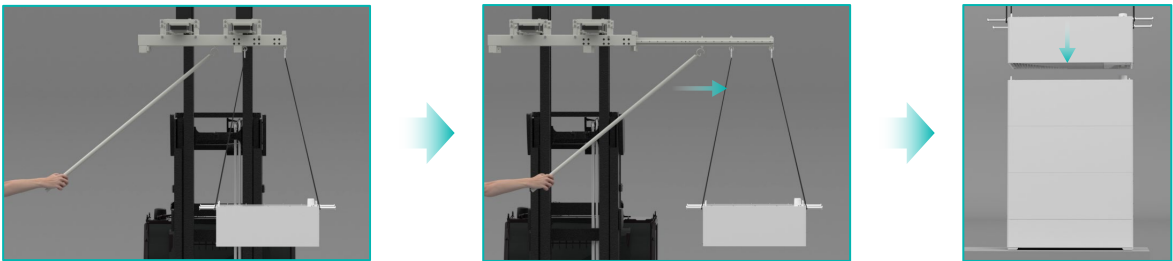

The lifting tool is secured to the fork of the forklift. Hang the lifting rope on the handles and hook on the outer rings of the lifting tool. Remove the latch and lift the SigenStack module.

Notice – SigenStack Lifting Tool Kit

2. SigenStack module stacking process

Use hook bar to horizontally move the SigenStack module to the predetermined position above. The maximum extension distance is 600mm. Align the floating terminals. Lower the forks to complete the installation.

Other information

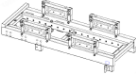

1. The outer packaging label (You can find the label on the packing box as below)
